A common goal: animal health and welfare

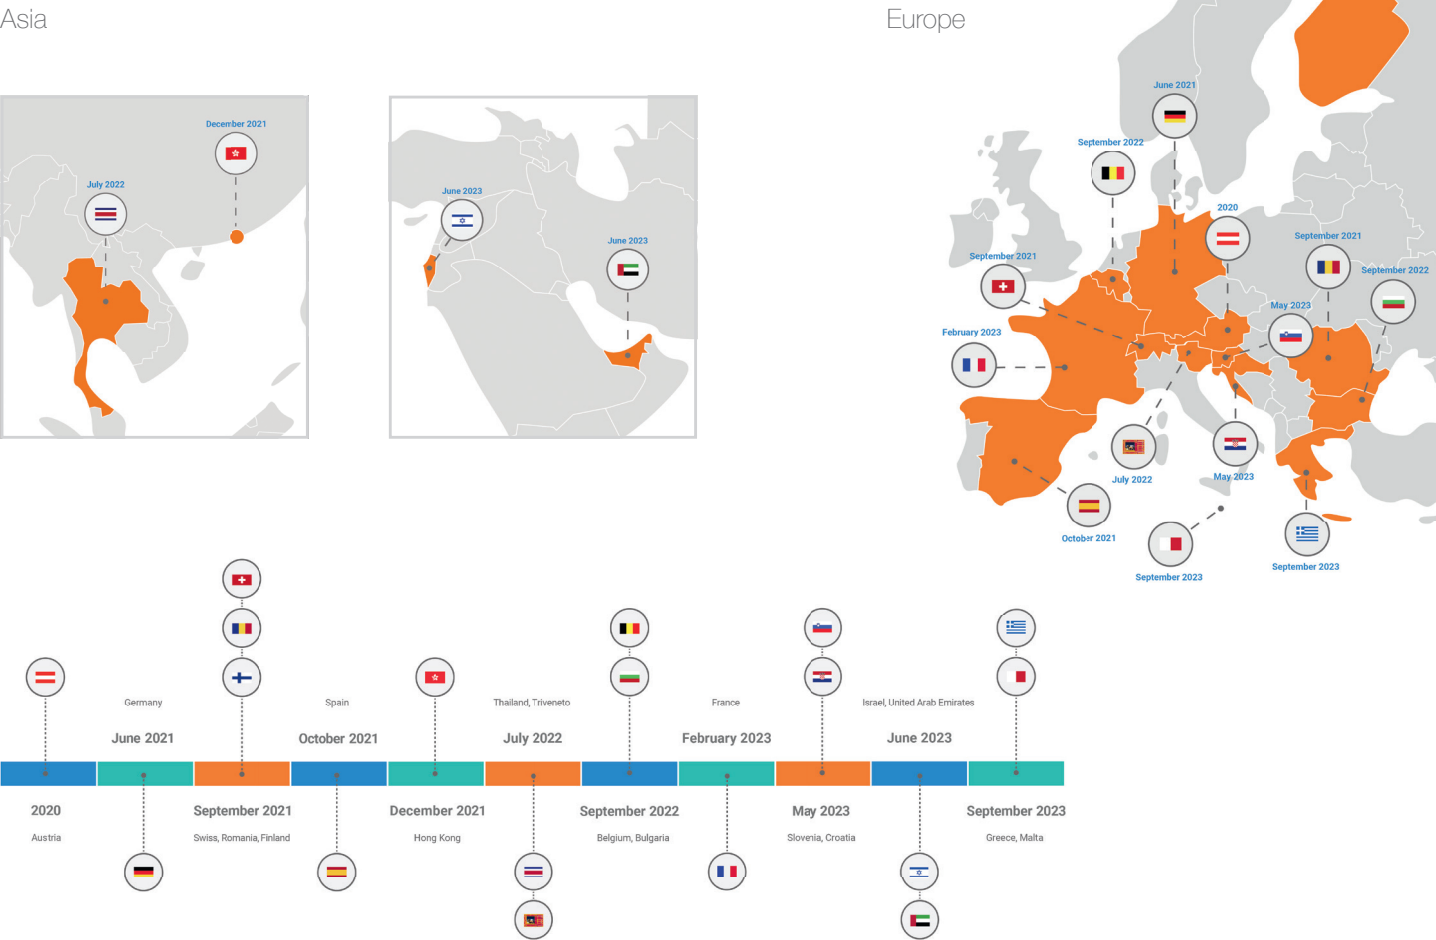

Loxotec is a young and dynamic company based in **Vienna, Austria**. Together with veterinarians, we pursue a common goal: to improve and support **the well-being and health of animals**. We are dedicated to the development and continuous improvement of **care products for the veterinary sector**.

The **Sanocyn^{forte}** product line is manufactured and bottled in Austria and Germany. All **Sanocyn^{forte}** products are based on our **advanced HOCL technology** and are manufactured using a specially developed electrochemical production process.

Recommended by veterinarians

Since every patient is different, treatment tailored to the **patient’s needs** is essential. When thorough medical advice meets efficient products, the best results can be achieved. For this reason, we distribute our products **exclusively through veterinarians**. In this way, the **excellent effect of Sanocyn^{forte}** is complemented by medical know-how.

Distributed worldwide

HOCL Technology

Hypochlorite (salt of hypochlorous acid) is part of the physiological defence mechanism and is released during phagocytosis, triggered by myeloperoxidase, eosinophil peroxidase or superoxide dismutase. Subsequently, the cell wall of the bacteria is destroyed and hypotonic cell damage is caused. Thus, **HOCL imitates the body’s own defence reaction**. In addition, **effects against fungi and viruses** have also been described. Sodium hydrochlorite is a substance with high potential and already belongs to the **renowned antiseptics** in the current **consensus recommendations** of human medicine.

The great interest is not least due to the fact that sodium hypochlorite is currently **the only active substance** besides tauridine that can also be safely used in body cavities in humans.¹

The effect of HOCL

- Extremely effective and fast-acting, reduces the germ load by > 99. 99% for the viruses, bacteria and fungi most frequently found in the practice
- Supports and strengthens the body’s own immune system
- Free of antibiotics, alcohol, dyes and perfumes
- Painless and easy to use
- Skin-friendly and gentle / pH-neutral / non-irritating
- Safe for use in body cavities such as ear and mouth
- Without chlorhexidine

What distinguishes HOCL from conventional agents?³

HOCL vs. Chlorhexidin	HOCL vs. Iodine	HOCL vs. Silver
Chlorhexidine can cause skin irritation	Iodine causes irritation of the mucous membranes	HOCL is non-toxic, tested according to FDA standard
Chlorhexidine can cause protein defects	Iodine poses a systemic risk to the thyroid gland	Silver is suspected of being carcinogenic
Chlorhexidine is corrosive	Iodine is mildly allergenic	
Chlorhexidine is ineffective against bacterial and fungal spores	Iodine can burn during use

How is HOCL used in practice?

The daily work of a veterinarian can be very demanding. Sanocynforte has been developed to facilitate a wide range of treatments. The **practical and simple application** of our products allows for **quick and efficient help** to support you in your profession as much as possible. Below you will find examples of use, a detailed listing of our products, as well as sample images of typical practical cases. The pictures were kindly **provided by veterinarians** who are already using our products successfully and with satisfaction.

HOCL can be used for various indications:

- Decontamination of acute wounds
 - > Bite wounds, lacerations, burns
- Treatment of chronic wounds
 - > Wounds with poor drainage, wounds in areas with poor blood supply
- Risk of CNS tissue exposure
 - > Deep puncture wounds, intraoperative
- Application in body cavities
 - > Can also be used as a peritoneal lavage, as well as in the eyes, ears, nose, and mouth
- Preventive cleaning of stressed body parts
 - > Paws, hooves, ...

Sanocyn^{forte} BiDirection System

Sanocyn^{forte} Skin and Wound Solution and **Sanocyn^{forte} Skin and Wound Hydrogel** are designed as an integrated system for wound treatment. Extensive rinsing with **Sanocyn^{forte} Solution** thoroughly cleanses the affected areas. **Sanocyn^{forte} Hydrogel** adheres particularly well, keeps the wound moist, forms a protective film and thus supports natural wound healing. The **best results** can be achieved by **combining both products**. Both products are suitable for use on **all animal species**.

Sanocyn ^{forte} Solution	Sanocyn ^{forte} Hydrogel
Rinse and clean	Protects the wound area
Supports the healing process	Continuous wound moistening
Daily wound care	Adheres to hard-to-reach areas
Removes dirt and debris	Prevents new and secondary infections

- Quick disinfection
- Cleaning and rinsing
- Moisture preservation
- Debridement
- Postoperative wounds
- Superficial and deep wounds
- Skin irritations and abrasions
- 1st and 2nd degree burns

Hoof, Wound & Skin Solution

Sanocyn^{forte} Solution is the remedy of choice for **bacterial or fungal** hoof diseases, wounds, cuts, skin irritations, skin injuries, insect bites and tick bites. The affected areas are cleaned by rinsing generously. The solution **eliminates unwanted bacteria, fungi and viruses** and creates the best conditions for **wound healing**. The **Sanocyn^{forte} Solution** is available in two different pack sizes to meet the different requirements of each patient.

Application on wounds, skin or hoof

1. Expose affected areas, e.g. by clipping the area
2. Rinse or spray generously with **Sanocyn^{forte} Solution**
3. Allow solution to dry; no wiping required
4. Repeat application several times a day

Hoof, Wound & Skin Solution

Size: 350 ml
Shelf life: 24 months
Dimensions: 20,5 x 7 cm
Weight: approx. 400 g

Skin & Wound Solution

Size: 75 ml
Shelf life: 24 months
Dimensions: 13,5 x 4 cm
Weight: approx. 100 g

Stallion, puncture wound

- Protection of the wound area
- Supports the healing process over a longer period of time
- Adheres to hard to reach areas
- Moisture preservation
- Debridement
- Postoperative wounds
- Superficial and deep wounds
- Skin irritations and abrasions
- 1st and 2nd degree burns
- Fistulas and abscesses

Hoof, Wound & Skin Solution

Sanocyn^{forte} Hydrogel adheres excellently, keeps the wound moist and forms a protective film that can prevent **new and secondary infections**. Due to its adhesive consistency, the hydrogel is particularly suitable for wound care, in the case of injuries, inflammations, skin irritations as well as insect bites and tick bites in **hard-to-reach areas**. **Sanocyn^{forte} Hydrogel** is offered in two different pack sizes to meet the different requirements of each patient.

Application on wounds, skin or hoof

1. Expose affected areas, e.g. by clipper
2. Apply **Sanocyn^{forte} Hydrogel**
3. Allow hydrogel to dry; no wiping required
4. Repeat application several times a day

Hoof, Wound & Skin Hydrogel

Size: 350 ml
Shelf life: 24 months
Dimensions: 20,5 x 7 cm
Weight: approx. 400 g

Skin & Wound Hydrogel

Size: 75 ml
Shelf life: 24 months
Dimensions: 13,5 x 4 cm
Weight: approx. 100 g

Dog, suture dehiscence post-circumanal gland adenoma surgery

3rd day of application vs. 7th day of use

© Mag. Petra Baumgartner, Small Animal Veterinarian

- Routine cleaning
- Fights unpleasant odours, removes dirt
- Highly tolerated and suitable for daily use
- Painless and non-burning
- Without alcohol, without oil
- pH-neutral

Ear Cleaner Solution

Size: 75 ml
Shelf life: 24 months
Dimensions: 13,5 x 4 cm
Weight: approx. 100 g

Ear Cleaner

Sanocyn^{forte} Ear Cleaner is a product for the **safe, simple and efficient cleaning** of animal ears. Dirt and debris are flushed out, irritation is soothed and **bacteria, viruses and fungi** are effectively combated. **Sanocyn^{forte} Ear Cleaner** is **highly tolerated** and is suitable for **routine cleaning** as well as for the **targeted treatment** of inflammations, bad odours and irritations.

Application

1. Gently guide the ear cleaner to the ear.
2. Insert the solution into the ear and the ear canal by gently squeezing the bottle together
3. Gently massage the ear with the whole hand to distribute the ear cleaner evenly
4. Gently clean the ear with a swab or cotton ball
5. The application can be repeated several times a day

Dog, Otitis externa

Multi-resistant germs, swollen ear canal due to inflammation or excessive scratching

© Dr. Tina Wassing, Mixed Practice Veterinarian

- Highly tolerated and suitable for daily use
- Painless and non-burning
- Non-toxic
- Safe for all animals
- Without alcohol, steroids or antibiotics
- pH neutral

Eye Cleaner Solution

Size: 50 ml
Shelf life: 24 months
Dimensions: 9,5 x 3,5 cm
Weight: approx. 70 g

Eye Cleaner

The **Sanocyn^{forte} Eye Cleaner Solution** is a product for the gentle cleaning, care and soothing of the **sensitive eye area of animals**. **Sanocyn^{forte} Eye Cleaner** can be used for the **safe and gentle prevention of discolouration** under the eyes.

Application

1. Moisten a clean cotton pad or cloth well with the solution for each eye
2. Clean the affected area from the inside to the outside
3. Rinse out foreign bodies: rinse with plenty of liquid by pressing lightly on the bottle
4. If necessary, repeat the application several times a day

Dog, chronic eye inflammation

Sticky debris because of overproduction of tear fluid

© Loxotec

- Effective against bacteria, viruses, fungi
- Fights unpleasant odours
- Prevents inflammation of the gums
- Painless, uncomplicated application
- Without alcohol
- Without colouring or fragrances
- Highly tolerated

Dental Hygiene Spray

The **Sanocyn^{dental} Dental Hygiene Spray** can be **quickly and easily distributed in the oral cavity** with its practical spray head. This ensures that all areas can be **cleaned evenly** and **effectively**. Daily use can curb or even prevent **unsightly discolouration** such as tartar. In addition, it counteracts bacterial growth through its **disinfecting effect**, which at the same time prevents unpleasant mouth odour and gingivitis.

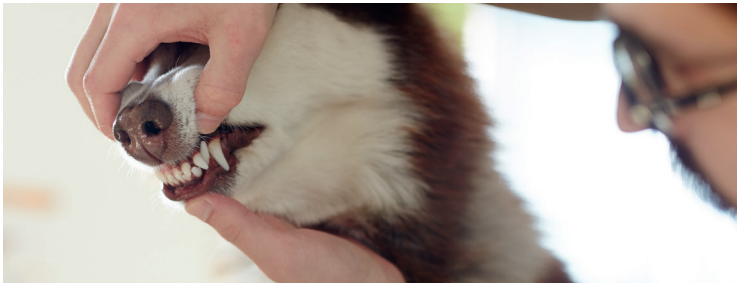

Application

Spray daily into the mouth of the animal. Pay special attention to **gingivitis and tartar**. To achieve particularly intensive cleaning results, it is recommended to use the **Sanocyn^{dental} Dental Hygiene Spray** in combination with the **Sanocyn^{dental} Microfibre Tooth Cleaner**.

Dental Hygiene spray

Size: 75 ml
Shelf life: 24 months
Dimensions: 13,5 x 4 cm
Weight: approx. 100 g

Dog, Gingivitis

Tartar and inflammation due to bacteria

© Dr. Tina Wassing, Mixed Practice Veterinarian

- Effective against bacteria, viruses, fungi
- Fights unpleasant odours
- Prevents inflammation of the foreskin
- Painless, uncomplicated application
- Without alcohol
- Without dyes or perfumes
- Highly tolerated

Preputial Rinsing Solution

The **Sanocyn^{forte} Preputial Rinsing Solution** for male dogs **dissolves and removes dead cells** as well **as secretion of the mucous membranes, urine residues** and at the same time **dirt**. **Regular use** can combat **inflammation of the foreskin**. In addition, it counteracts bacterial growth through its disinfecting effect, which prevents new infections and successfully prevents unpleasant odours or **spontaneous secretion**.

Application

1. Clean the foreskin opening with a swab soaked in the solution
2. Pull back the foreskin and insert the applicator between the foreskin and the penis
3. Apply solution by pressing on the bottle and distribute it in the fold of the foreskin
4. Allow the liquid to drain off
5. Repeat application daily if necessary
